Early Learning in North Dakota

By Jessica Troe  July 2016

North Dakota families need access to affordable child care and preschool to support working parents and to ensure that children start kindergarten ready to learn. During the first five years of life, children learn critical skills such as language and socio-emotional regulation, which provide a foundation for lifelong learning. High-quality preschool and child care can support healthy development and enable parents to work. Unfortunately, too many children are left behind by the status quo. In fact, differences in children's cognitive abilities by income are evident at only 9 months old and significantly widen by the time children are age 2. Early learning has positive impacts for children, families, and the economy. It’s time to work to put these programs within reach.

North Dakota families need access to high-quality child care and preschool
North Dakota has 60,705 children under age 6, 72 percent of whom have all available parents in the workforce.

High-quality child care and preschool programs help narrow school readiness gaps, which is particularly important for children of color and those living in low-income families.

The cost of child care is out of reach for families
Annual costs at a child care center in North Dakota average $15,728 for an infant and a 4-year-old, which is 22 percent of the median income for families with children.

For low-income families and people of color, the average cost of child care would constitute the majority of income in most cases.

The current child care system is failing North Dakota families
On average, the Child Care and Development Block Grant, or CCDBG, serves only 13 percent of federally eligible children in North Dakota. This results in only 3,200 North Dakota children served through CCDBG funds. Of those served, 37 percent attend licensed or regulated center-based care.

* Race and ethnicity of children younger than age 5:

<table>
<thead>
<tr>
<th>Race/Ethnicity</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>White</td>
<td>78%</td>
</tr>
<tr>
<td>African American</td>
<td>3%</td>
</tr>
<tr>
<td>Latino</td>
<td>6%</td>
</tr>
<tr>
<td>Asian</td>
<td>1%</td>
</tr>
<tr>
<td>American Indian and Alaska Native</td>
<td>8%</td>
</tr>
<tr>
<td>Native Hawaiian and Other Pacific Islander</td>
<td>&lt;0.5%</td>
</tr>
<tr>
<td>Two or more races</td>
<td>4%</td>
</tr>
</tbody>
</table>

22.5 percent of North Dakota’s children under age 5 are children of color.
North Dakota families need greater access to high-quality preschool programs
North Dakota currently does not have a state-funded preschool program.\textsuperscript{15} This preschool program meets no program quality benchmarks set by the National Institute for Early Education Research and spends $0 annually per student.

In North Dakota, 13 percent of 3-year-olds and 16 percent of 4-year-olds are enrolled in a public preschool program.\textsuperscript{16}

Investing in high-quality early learning programs affects economies
Making child care more affordable for families can increase mothers’ workforce participation, resulting in a boost to the state’s economy.\textsuperscript{17}

In North Dakota, if child care costs did not exceed more than 10 percent of a family’s income, the state’s economy would increase nearly $2.32 million.\textsuperscript{18}

We can do better for North Dakota families
The Center for American Progress proposes two solutions to put high-quality child care and preschool within reach for North Dakota families and create an early childhood learning continuum for children:

• A new High-Quality Child Care Tax Credit would help families afford high-quality care for their children. This tax credit would benefit an estimated 14,000 children in North Dakota\textsuperscript{19} and save families an average of $4,671 per year on child care costs.\textsuperscript{20}

• Voluntary universal preschool for all 3- and 4-year-olds.\textsuperscript{21} This would increase access for 16,500 children in North Dakota.\textsuperscript{22}
