

Early Learning in Nevada

By Jessica Troe July 2016

Nevada families need access to affordable child care and preschool to support working parents and to ensure that children start kindergarten ready to learn. During the first five years of life, children learn critical skills such as language and socio-emotional regulation, which provide a foundation for lifelong learning.¹ High-quality preschool and child care can support healthy development and enable parents to work. Unfortunately, too many children are left behind by the status quo. In fact, differences in children's cognitive abilities by income are evident at only 9 months old and significantly widen by the time children are age 2.² Early learning has positive impacts for children, families, and the economy.³ It's time to work to put these programs within reach.

Nevada families need access to high-quality child care and preschool

Nevada has 221,494 children under age 6,⁴ 65 percent of whom have all available parents in the workforce.⁵

High-quality child care and preschool programs help narrow school readiness gaps, which is particularly important for children of color and those living in low-income families.⁶

The cost of child care is out of reach for families

Annual costs at a child care center in Nevada average \$17,970 for an infant and a 4-year-old,⁹ which is 33 percent of the median income for families with children.¹⁰

For low-income families and people of color, the average cost of child care would constitute the majority of income in most cases.¹¹

The current child care system is failing Nevada families

On average, the Child Care and Development Block Grant, or CCDBG, serves only 6 percent of federally eligible children in Nevada.¹² This results in only 4,100 Nevada children served through CCDBG funds.¹³ Of those served, 80 percent attend licensed or regulated center-based care.¹⁴

Children living in low-income families⁷

■ Share of children younger than age 6 living in low-income households

Race and ethnicity of children younger than age 5^{8*}

36% ■ White
9% ■ African American
41% ■ Latino
5% ■ Asian
1% ■ American Indian and Alaska Native
1% ■ Native Hawaiian and Other Pacific Islander
7% ■ Two or more races

64 percent of Nevada's children under age 5 are children of color.

Nevada families need greater access to high-quality preschool programs

The Nevada State Pre-Kindergarten Program provides grants to serve children ages 3 to 5, but preference is given to 4- and 5-year-olds that will enter kindergarten the following year. Children are prioritized if they meet risk factors such as being from low-income families or receiving special education services.¹⁵ This preschool program meets 7 quality benchmarks set by the National Institute for Early Education Research and spends \$3,424 annually per student.

In Nevada, 5 percent of 3-year-olds and 7 percent of 4-year-olds are enrolled in a public preschool program.¹⁶

Investing in high-quality early learning programs affects economies

Making child care more affordable for families can increase mothers' workforce participation, resulting in a boost to the state's economy.¹⁷

In Nevada, if child care costs did not exceed more than 10 percent of a family's income, the state's economy would increase nearly \$19.25 million.¹⁸

We can do better for Nevada families

The Center for American Progress proposes two solutions to put high-quality child care and preschool within reach for Nevada families and create an early childhood learning continuum for children:

- A new High-Quality Child Care Tax Credit would help families afford high-quality care for their children. This tax credit would benefit an estimated 56,400 children in Nevada¹⁹ and save families an average of \$6,895 per year on child care costs.²⁰
- Voluntary universal preschool for all 3- and 4-year-olds.²¹ This would increase access for 76,300 children in Nevada.²²

***Correction, July 19, 2017:** This fact sheet has been updated to clarify that the second pie chart refers to state-specific data.

Cost of child care as a share of income for people of color¹⁰

American Indian	60%
Asian and Pacific Islander	27%
African American	49%
Latino	47%

Cost of child care as a share of income for low-income families¹¹

100 percent of the federal poverty level	74%
150 percent of the federal poverty level	49%
200 percent of the federal poverty level	37%
