Early Learning in Nevada: 2017
July 2017

Nevada families need access to affordable child care and preschool to support working parents and to ensure that children start kindergarten ready to learn. During the first five years of life, children learn critical skills such as language and socio-emotional regulation, which provide a foundation for lifelong learning. High-quality preschool and child care can support healthy development and enable parents to work. Unfortunately, too many children are left behind by the status quo. In fact, differences in children’s cognitive abilities by income are evident at only 9 months old and significantly widen by the time children are age 2. Early learning has positive impacts for children, families, and the economy. It’s time to work to put these programs within reach.

Nevada families need access to high-quality child care and preschool
Nevada has 224,841 children under age 6, 65 percent of whom have all available parents in the workforce.

High-quality child care and preschool programs help narrow school readiness gaps, which is particularly important for children of color and those living in low-income families. Thirty-six percent of Nevada children under age 6 live in low-income families.

The supply of high-quality child care is limited. Many states have implemented quality rating and improvement systems (QRIS) to assess and support quality in early care and education programs. Currently, 30 percent of Nevada child care centers participate in QRIS.

The cost of child care is out of reach for families
Annual costs at a child care center in Nevada average $19,085 for an infant and a 4-year-old, which is 34 percent of the median income for families with children.

For low-income families and people of color, the average cost of child care would constitute the majority of income in most cases.
The current child care system is failing Nevada families
On average, the Child Care and Development Block Grant (CCDBG) serves only 6 percent of federally eligible children in Nevada. This results in only 5,600 Nevada children served through CCDBG funds. Of those served, 77 percent attend licensed or regulated center-based care.

Nevada families need greater access to high-quality preschool programs
The Nevada State Pre-Kindergarten Program provides grants to serve children ages 3 to 5, but preference is given to 4- and 5-year-olds that will enter kindergarten the following year. Children are prioritized if they meet risk factors such as being from low-income families or receiving special education services. This preschool program meets, on average, 7 quality benchmarks set by the National Institute for Early Education Research and spends $4,512 annually per student.

In Nevada, 5 percent of 3-year-olds and 8 percent of 4-year-olds are enrolled in a public preschool program.

Investing in high-quality early learning programs affects economies
Making child care more affordable for families can increase mothers’ workforce participation, resulting in a boost to the state’s economy.

In Nevada, if child care costs did not exceed more than 10 percent of a family’s income, the state’s economy would increase nearly $19.25 million.

We can do better for Nevada families
The Center for American Progress proposes two solutions to put high-quality child care and preschool within reach for Nevada families and create an early childhood learning continuum for children:

- If child care costs are capped at 10 percent of a family’s income, Nevada families would save $4,707 a year.
- Voluntary universal preschool for all 3- and 4-year-olds. This would increase access for 57,700 children in Nevada.
Endnotes

8 Note: IL, NH, and OK require participation in QRIS or it's required by licensing standards, and therefore participation is listed as 100 percent. FL has three regional QRIS with available data: MD is Miami-Dade County, PB is Palm Beach County, and D is Duval County.

18 Ibid.

19 Note: In states that do not serve 3-year-olds or with no state-funded preschool program, enrollment rates include federal Head Start only.
