Federal Funding Is Essential To Saving New Hampshire’s Public Services

By Ryan Zamarripa    July 10, 2020

The COVID-19 pandemic and resulting recession are wreaking havoc on New Hampshire; the state is facing a massive revenue shortfall, which will significantly affect its budget and ability to provide crucial services. Federal funding is needed to help New Hampshire, along with the local governments within the state, ensure that health care, education, transportation, first responders, and other services continue uninterrupted. The picture is already bleak: Since the pandemic started, the state has lost 9,800 public sector jobs. The economic gravity of the shortfall cannot be stressed enough. Without further federal aid to state and local governments, New Hampshire is projected to lose 21,600 private and public jobs by the end of 2021. The recent resurgence of the virus only compounds the urgency and should dispel all complacency.

The coronavirus pandemic has decimated New Hampshire’s economy.

• In May, New Hampshire had an unemployment rate of 14.5 percent, one of the highest rates ever recorded, with roughly 90,000 more state residents out of work than in February.

• As of early July, approximately 230,000 New Hampshirites, representing 29.4 percent of the state’s February labor force, have filed unemployment insurance claims since the beginning of March. Some estimates are projecting a double-digit unemployment rate well into 2021.

New Hampshire’s tax revenues are plummeting, creating a severe funding crisis for schools, health care, and other critical services. New Hampshire has not yet released information on projected shortfalls, but every state that has released COVID-19-related budget data has noted significant shortfalls for the next several years.
Cities in New Hampshire are facing serious revenue shortfalls as well. Manchester alone has recently projected a budget shortfall of $2 million, according to local sources. The National League of Cities estimates that cities will experience $360 billion in revenue loss through FY 2022, which will force them to significantly cut spending on crucial services or raise taxes on already recession-battered residents. Studies on the Great Recession have found that forcing states to deal with severe budget constraints through austerity dampen long-term gross domestic product (GDP), prolong spells of high unemployment, and extend recessions.

Between February and May, 9,800 public sector workers were laid off in New Hampshire.

- The National Education Association has estimated that by the end of FY 2022, New Hampshire could lose roughly 4,600 education jobs as a result of the decline in the state general revenues that fund education.

These job losses could get much worse. A recent analysis conducted by the Economic Policy Institute estimates that without federal action, New Hampshire will lose a combined total of 21,600 public and private jobs by the end of 2021.

Health care in New Hampshire is also in jeopardy. The Urban Institute has projected that Medicaid caseloads could increase by as much as 61,000, or 37.3 percent, through FY 2021—a massive and unprecedented spike. New Hampshire desperately needs help to cover those who are newly unemployed and expected to enroll in Medicaid and to offset extra Medicaid costs related to COVID-19. Without proper funding, the state will be unable to treat at-risk patients, keep families healthy, or provide lifesaving care. Funding Medicaid is critical to ensuring that New Hampshire can respond effectively to the coronavirus public health crisis and the current economic recession.
The Health and Economic Recovery Omnibus Emergency Solutions (HEROES) Act, which passed the U.S. House of Representatives on May 15 with bipartisan support, includes provisions that would help New Hampshire avoid additional layoffs and devastating cuts to services.

Specifically, it would:

- Allocate $3.5 billion to the government of New Hampshire and $1.5 billion to its localities over a span of two years, saving thousands of jobs and helping to maintain the uninterrupted delivery of public services such as health care, first responders, and safe drinking water.

- Increase New Hampshire’s Federal Medical Assistance Percentage (FMAP) and provide an additional $480 million in Medicaid dollars to New Hampshire over an 18-month period.

- Provide $270 million for education in New Hampshire, including $175 million for public K-12 schools and $81 million to public colleges and universities, which would save an estimated 2,000 jobs supporting K-12 education and 500 supporting higher education. This funding would help strengthen distance learning and teaching strategies to keep students and teachers healthy.

Conclusion

As the recession stretches into the second half of 2020, it is becoming increasingly clear that states and localities are at the forefront of combating the pandemic and its economic fallout. From keeping students enrolled in remote learning programs to equipping community health centers with the protective gear needed to safely treat COVID-19 patients, state and local involvement can be seen and felt everywhere.

It is likely that both the coronavirus pandemic and the recession it led to are far from over. To help ease the financial pressures that states and localities are currently facing, it is imperative that the federal government pass legislation to:

1. Allocate at least $915 billion in direct grants to states, localities, tribes, and territories.
2. Increase the Medicaid FMAP by at least 14 percentage points until June 30, 2021.
3. Provide at least $90 billion to the State Fiscal Stabilization Fund to support both public schools and public colleges and universities.

Congress must act to get states and localities the aid they desperately need. New Hampshire and its residents can’t afford to wait.
