

What's at Stake

How the U.S. Supreme Court Could Force More Floridians to Go Without Health Coverage

February 4, 2015

On March 4, 2015, the U.S. Supreme Court will hear *King v. Burwell*, a lawsuit that seeks to strip premium tax credits from people who live in states with a federal insurance marketplace under the Affordable Care Act, or ACA. Repealing this pillar of the law, which helps make health coverage more affordable for consumers, would have severe consequences.

The stakes could not be higher. The sudden elimination of a key component of the ACA would cause substantial disruptions to the U.S. health care system. Moreover, it would take away health insurance coverage from more than 8 million Americans and cause premiums to spike for millions more. In Florida alone, nearly 1.2 million people would lose an average of \$3,290 in tax credits and cost-sharing reductions, with many of these people losing their insurance entirely.¹ All told, more than 1 million Floridians would become uninsured.²

This court decision has the potential to upend the health care system at the same time that the Affordable Care Act is working. In Florida alone, nearly 1.3 million people³ have coverage through its federal marketplace, and 93 percent of those enrollees have received financial assistance.⁴

Repealing tax credits would cause widespread turmoil in the health care system

If the U.S. Supreme Court were to rule in favor of the plaintiffs in the *King v. Burwell* case:

- **One million Floridians would lose their insurance.** According to the Urban Institute, 1,073,000 Floridians would be unable to afford their health insurance coverage and would become uninsured if the U.S. Supreme Court repeals the tax credits available under the Affordable Care Act in the federal marketplaces.⁵

1,073,000

Floridians would lose coverage

Nearly 1.2 million Floridians would lose an average of

\$3,290

in tax credits and cost-sharing reductions

- **Overall, nearly 1.2 million Floridians would lose an average of \$3,290 in tax credits and cost-sharing reductions.** According to the Urban Institute, 1,184,000 people would lose an average of \$3,290 in tax credits and cost-sharing reductions—a total of \$3.9 billion—if the U.S. Supreme Court rules in favor of the plaintiffs.⁶

The Affordable Care Act is working: Tax credits help lower the cost of premiums for Floridians

- **Nearly 1.3 million Floridians have selected a marketplace plan.** As of January 16, 2015, 1,270,955 Floridians have selected a marketplace plan.⁷
- **Ninety-three percent of Floridians who selected a marketplace plan received financial assistance.** As of January 2015, 93 percent of Floridians who selected a plan in the federal marketplace received financial assistance to help lower the cost of their health coverage.⁸
- **The uninsured rate in Florida dropped 3.2 percentage points from 2013 to 2014.** From the beginning of 2013 to mid-2014, the uninsured rate in Florida dropped 3.2 percentage points, from 22.1 percent to 18.9 percent.⁹
